Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Drawings

The drawings are objected to because the lines in Figures 6 and 7 are not uniformly thick and well defined. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 6, 7, 10, 11 and 14-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Flader et al. (U.S. Patents 6,558,069 and 6,511,256).

Each of the Flader et al. patents discloses a roadway marker having a base (12) and lens (40) having a plurality of retroreflective surfaces (24) aligned for reflecting light from a vehicle. The apparatus uses fluorescent material on the lens.

Orange is specified as a color of the fluorescent material.

Regarding claims 6, 7, 10 and 11, the base is specifically recited as optionally including the fluorescent material, thereby meeting claim recitations.

Art Unit: 3671

The retroreflective surfaces (24) are on the rear surface of the lens (Figure 1, considering the portion facing the top left corner of the page as the front of the marker).

The daytime signal region (47) is free of retroreflective surfaces.

Regarding claim 16, there are ribs (30) and grooves (32).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4, 5, 8, 9, 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Flader et al., as applied above.

Flader et al. specifically teach using any color desired in order to meet design criteria. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have used the colors as claimed in order to convey appropriate information, as is standard practice with road markers.

Conclusion

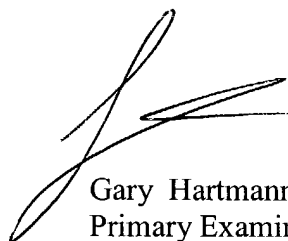

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
